Webcast: Addons In Real Life @ CodeArt

Allan Thraen | 1 Years Ago | PDF | 5 | 28 Shares

Last week I did a couple of talks at Episerver User Group meetings in Denmark about how I've tweaked my Episerver installation at codeart.dk in order to work as a great blogging platform. I also showcase a few of the addons I'm currently working on. Now I recorded the talk, so if you have a 23 minutes to spare, then grab a coffee and make some popcorn and have a look.

This is my first codeart recording, so take a look and feel free to send me feedback, suggestions and ideas! Or leave a comment below if you want me to show more.

Slides are below as well.

About Allan

I'm a freelance software architect / developer and Episerver expert (EMVP) based in Copenhagen Denmark. I've worked for Episerver for more than 10 years before going freelance and understand both your business needs as well as the technical possibilities.

I love solving real business problems with innovative and creative coding!

Learn more about my skills and specialities, reach out to me at info@codeart.dk or use this form to contact me.

Hi Janne, I will definitely share my client-side tracking solution in a blog post soon!

 Thanks Dejan! Turns out embedding a video isn't enough, you apparently have to make a video Public on youtube for other people to be able to watch it. That just shows how often I publish stuff on YouTube :-)) Fixed now.
