CODEMANIA 2010 CONTINUED

I just realized that I in this previous post forgot to share my “search page provider” – a page provider that searches for the newest pages in a specific page type using Johan Olofssons LINQ to PageData – and returns the results as children.

It’s a little bit special because it in itself does not actually create any pages – it just returns links to other already existing pages.

```
1:  using System;
2:  using System.Collections.Generic;
3:  using System.Linq;
4:  using System.Web;
5:  using EPiServer.Core;
6:  using EPiServer.Research.Page.Linq;
7:
8:  namespace EPiServer.PageProviders
9:  {
10:     public class SearchProvider : PageProviderBase
11:     {
```
